Brooklyn Networks

Our highly-trained cable installers are ready to work for you.

— **Brooklyn Networks** graduates work in more than 50 NYC firms and a variety of fields, including: voice/data lines, satellite and broadcast cable, residential and office installation, and security systems.

— **Graduates** are trained and certified in the BICSI Information Transportation Systems Level 1 curriculum (www.BICSI.org) as well as certified by OSHA.

— **All technical training** takes place in our state-of-the-art lab at NYC College of Technology. Our instructor brings over 20 years of real world experience to the classroom.

Graduates complete hands-on tasks

— **Standards and Codes**
- All training and tasks are in accordance with ANSI/TIA/EIA standards and the National Electric Code (NEC)
- Knowledge of all applicable standards and codes

— **Pull Cable**
- UTP and Optical Fiber, through conduit, closed walls and open ceilings

— **Terminations**
- Route and terminate UTP cable on 66, 110, BIX, Krone, 210 and Gigabix blocks to CAT 5E and CAT 6 Standards.
- Work area outlets to T568A and T568B wiring schemes (including Caddy installation in sheetrock)
- Patch Panels

— **Connectorizations**
- Modular Plugs
- BNC Connectors (one piece and three piece)
- F Connector (crimp and compression)
- Ground Connectors
- Testing UTP, Coax and Optical Fiber
- Test Copper UTP Cable using a VOM and basic testing with certification test set
- Test Coaxial Cable its Connectors and terminations using a VOM
- Test attenuation on optical fiber cable using an optical light test set (OLTS)

— **Print and Schematic Reading**
- Jobs involving backbone and horizontal cable; work area outlets and patch panels; all jobs are based on prints and tested after completion

— **Firestopping**
- Determine, select and install
